Information for students in isolation or quarantine

Why is it important to isolate or quarantine?
According to public health guidance, isolating or quarantining is highly effective in reducing transmission because it keeps a potentially infected person separated from others and reduces the likelihood of spreading the coronavirus. Quarantine may seem like a passive process, but it actively combats the spread of the virus. Everyone at QU who strictly quarantines contributes to keeping transmission lower and reducing the likelihood of the virus being brought to, or spreading on, our campuses. In other words, through this containment period we are keeping each other—and our surrounding community—safe.

What if I receive a notification that I’ve been selected for weekly COVID testing while in isolation or quarantine?
If you receive an email request to attend the weekly COVID-19 testing while you’re in isolation or quarantine, you should not attend the testing. Students will not be counted as having “missed” a testing appointment, and we will be able to confirm through our isolation/quarantine records that you were unable to attend.

Information about Isolation

When does a student need to be in isolation?
Isolation is used when someone has tested positive for COVID-19 or has symptoms consistent with the infection. Quinnipiac has set aside specific residence halls designated for safe isolation as part of our plan to contain any outbreak. All students who need to isolate also have the option to isolate at home.

Who will monitor the health of students in isolation?
• QU has partnered with UST Global to provide a dedicated team of registered nurses who will provide telephone support and will check in with students in isolation daily.
• Students also are asked to log their symptoms each day using the Symptom Checker app.
• Students will be given a thermometer and pulse oximeter (which measures oxygen levels in the body) to assist in monitoring. Students will be asked for these readings during their daily check-ins, but students also can take these measurements on their own.
  • Generally, pulse oximeter values should be in the upper 90s. If the number seems low, try readjusting it, using another finger or contact Student Health Services with questions.
• Students who are isolated on campus will have full access to wireless internet in their rooms and can continue to attend their classes online as well as virtual activities as appropriate, depending upon their health.

Information about Quarantine

When does a student need to be in quarantine?
Quarantine is used when a person has been exposed to COVID-19 and needs to separate from other people as a preventive measure in case symptoms develop over 10 days following the exposure. Whether a student needs to quarantine because of a potential exposure to COVID-19 is determined by our contact tracing protocol, which assesses: 1) proximity of less than 6 feet to an individual who is presumed to be positive, and 2) duration of contact for more than 15 minutes. All students who need to quarantine also are given the option to quarantine at home.

Who will monitor the health of students in quarantine?
• QU has partnered with UST Global to provide a dedicated team of registered nurses who will provide telephone support and will check in with students in quarantine daily.
• Nonresidential students who live in off-campus housing will be asked to quarantine in their off-campus home. The university will provide guidance on how to safely quarantine at home.
• Students need to stay in their designated quarantine space for 10 days from the time of exposure, or until they are cleared by Student Health Services. A student may be released from quarantine earlier if the individual whom they were initially exposed to tests negative.
• Students should call 911 for immediate medical assistance if they are experiencing severe shortness of breath, confusion, blueish lips or nail beds or chest pain. Inform the person answering the call that you are in quarantine for COVID-19.
• Students who are quarantined on campus will have full access to wireless internet in their rooms, can continue to access the dining hall for meals and can continue to attend their classes online as well as virtual activities as appropriate.

Asking for help if you need it
Sometimes we all need help. If being in isolation or quarantine is one of those moments, don’t hesitate to ask for help. The Counseling Center, Student Health Services and Residential Life staff are all here to support you when you need it. Don’t hesitate to contact our Counseling Center 24 hours a day/7 days a week.
When checking in to isolation or quarantine

Step 1: Students need to notify their professors that they will be attending their classes remotely. There is no need to reveal the isolation or quarantine situation, unless you prefer to do so.

Step 2: Students need to download the QU Symptom Checker app. The QU Symptom Checker app is one of the tools used to help monitor students’ health.

STUDENTS MUST LOG THEIR SYMPTOMS DAILY WHILE IN QUARANTINE OR ISOLATION.

What to pack

Students entering isolation or quarantine will need up to at least 10 days’ worth of clean clothing, toiletries, any medications, their laptop and any class-related materials, including textbooks and notebooks. In addition, students are encouraged to bring items that offer comfort and that help to pass the time, such as books or e-readers, music, video games, a musical instrument, art supplies or other items to allow for creativity.

Note: linens are provided to all students who are quarantining or isolating in Bakke, Sahlin or Founders Hall. These linens are professionally cleaned and laundered and should be left in the room after a student checks out of isolation or quarantine.

Suggested packing list:
- Backpack, small luggage or duffel bag
- Clean clothing
- Blanket/comforter
- Toothbrush and toothpaste
- Nail clippers
- Soap and shampoo
- Room slippers/shower shoes
- Toiletries, personal care items and personal hygiene supplies
- Medications
- Eyeglasses/contact lenses and related supplies
- Quinnipiac ID, insurance card, wallet, credit cards and other essential documents
- Laptop and charger
- Phone and charger
- Materials to enable you to do classwork or remote research
- Journal and writing instruments
- Books or magazines
- Fan

Dining information

When in isolation – Meals will be delivered to residential students in isolation and charged to a student’s meal plan; the cost is $25/day. Our goal is to deliver meals between 5:30–6:30 p.m. Each delivery will include a hot dinner, as well as breakfast and lunch items for the following day. Within 24 hours, each student will receive an email that includes a link inviting them to sign up for meals and submit any dietary restrictions. The menu rotates daily and students in isolation must fill out the form no later than 2 p.m. each day. On the first day, depending upon what time a student checks into isolation, time may not permit meals to be ordered from the rotating menu but a meal will still be provided.

Microwaves and a small selection of water, Gatorade, snack foods and instant meals have been provided in each room for student use. The rooms also contain refrigerators and stoves.

Residential students living in off-campus QU-owned housing have the option to either sign up for the daily meal deliveries or provide their own meals. If opting for daily meal deliveries from QU Dining Services, students can add additional funds to their meal plan if needed.

When in quarantine – Residential students in quarantine are permitted to go to the dining hall to get their meals each day. It is recommended that students use the Transact mobile ordering app so meals are waiting for pick up. Students may only go to the dining hall and must return immediately to their room without making any other stops.

Your point-of-contact while in isolation or quarantine

We know having to quarantine is a new experience—for all of us! And we’re sure you’ll have questions throughout the process. We have two dedicated staff members who are here to help. Reach out to either Sarah or JoLynn with any questions or needs you may have. If they cannot address your issue themselves, they’ll be your single point-of-contact to help connect you to whatever resources are needed.

Seeing this time as an opportunity

Bottom line: QU is here to help you get through isolation or quarantine on a healthy note.

Here are a few suggestions to help pass the time during isolation or quarantine. It will be over sooner than you think. At the end, you will have made a real contribution to public health, the health of your fellow classmates, and the QU community. We recommend that you approach this two-week period with hope, possibility and intellectual curiosity, in keeping with the values QU imparts.

Write. Read. Create.

You might want to consider a writing project that you’ve wanted to take on, music you’ve wanted to learn, or a piece of art you’ve wanted to create.

Don’t just binge-watch your favorite shows; you also can use the period to immerse yourself in a number of virtual offerings available from the university:

- The Virtual Quad has a complete list of the latest university events and activities, as well as an extensive archive of on-demand programming, from Puppy University to how celebrity influencers use social media.
- Catch some career advice and forward-looking perspectives from various industry leaders who have participated in Quinnipiac’s new Presidential Speaker Series: “The Way Forward.”
- Check out our entrepreneurial programming and advice from past speakers through the People’s United Center for Innovation & Entrepreneurship and the People’s United Center for Women & Business.
- Learn more about our Student Clubs and Organizations.
- Discover QU’s Department of Cultural and Global Engagement.
- Explore job and career possibilities at Career Development.
- Learn how you can get involved with the Podcast Studio.
- Check out our On-Demand Library of Fitness Classes.

Exercise.

For students who are not experiencing symptoms, exercise is permitted. Aerobic and bodyweight exercises are permitted within your room if the exercise does not provoke symptoms such as chest pain or shortness of breath out of proportion to the level of exertion.

On-demand meditation & breathing practices

- Yoga Nidra for Ability & Capacity to Relax
- Elongated Exhale Breathing Technique
- Breath Awareness
- Yoga Nidra
- Tune Into Your Body & Breath
- Body Scan
- Alternate Nostril Breathing
