

LEAVES OF ABSENCE

Leaves of absence may be arranged for one or two semesters through the registrar, subject to departmental and school approval. At the conclusion of the leave of absence, the student receives automatic readmission to the University. The granting of a leave of absence guarantees readmission to the major in which the student is enrolled when applying for a leave and permits the student to graduate by complying with the degree program requirements in effect when the leave is taken, provided that the courses are still offered. If requirements for graduation are changed after a student is first admitted to Quinnipiac, the student can choose to follow either the former or the new requirements. During the leave of absence, Quinnipiac retains the student's deposit until completion or withdrawal.

If a student takes a leave of absence and later is suspended, dismissed, placed on warning for unsatisfactory academic performance (including academic integrity sanctions), or suspended or expelled as the result of a conduct decision, the sanctions take precedence over the leave of absence and stand as a matter of record. Any academic warning becomes operative at the time of return to the University. An involuntary medical leave of absence takes precedence over a voluntary leave of absence and the student must comply with the terms of the medical leave.

Leaves of absence are not granted for the purpose of allowing a student to study at another university. In general, courses taken at another institution while a student is on a leave of absence will not be transferred in for credit at Quinnipiac.

Students who do not return after the specified leave of absence period will be administratively withdrawn and will be required to reapply for admission in order to return to the University. In such instances there is no guarantee of readmission.

Military Leaves

Students in the military reserves who are enrolled when they are called to active duty, can choose:

1. Withdrawing from courses with a full tuition refund or tuition credit, in accordance with institutional and federal government guidelines.
2. If a student has completed at least 50 percent of the course work and upon recommendation of his/her dean, the student may elect to take incompletes and make special arrangement for course completion with individual instructors.

Students needing to take a military leave should contact the director of veteran and military affairs at 203-582-8867.

Students are eligible to return within one year following active duty. However, the degree requirements may have changed, and they may be required to comply with degree program requirements in effect at the time of their return to the University.

Medical Leaves of Absence

Students who wish to withdraw from the University during an academic term for medical reasons (i.e., physical or mental health conditions that necessitate their absence), may request a medical leave of absence.

The student must provide supporting documentation of the medical condition from his or her treating physician to the director of health and wellness or designee, who will review the documentation with the

appropriate University staff and with the University's consulting medical professional, if warranted. A medical leave of absence may be granted for one or two semesters although, under special circumstances, the University may agree to extend the leave beyond two semesters. Upon conclusion of the medical leave, the student must provide supporting documentation from his or her treating physician to the director of health and wellness or designee that confirms the student is fit to return. This documentation will be shared with the appropriate University staff, including the University's consulting medical professional, if warranted. The student will be advised of the outcome of this review and whether he or she is cleared to return, with or without a reasonable accommodation.

Involuntary Medical Leaves of Absence

The University may place a student on an involuntary medical leave of absence in situations where it determines, after conducting an individualized and case-by-case assessment, that there is a significant risk that the student will harm himself/herself or another, and that the risk cannot be eliminated or reduced to an acceptable level through reasonable accommodations. The director of health and wellness will make this decision, and the director or the director's designee will promptly notify the student's parents, legal guardians or emergency contact accordingly. The director or the director's designee also will make arrangements to remove the student immediately from the University.

Once the leave begins, in the interim, pending an evaluation by a University consulting medical professional, the director of counseling services and the coordinator of learning services or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to participate in the educational programs at the University and to continue to attend his or her classes while seeking treatment. The student must undergo an evaluation with one of the University's consulting medical professionals, which will be arranged and paid for by the University. The student must release all relevant medical information from his or her treating physician to the University's consulting medical professional prior to the evaluation. The results of the evaluation will be reviewed by the director of counseling services and the associate vice president for student affairs or their designees, and a decision will be made whether the student may return to the University immediately, with or without a reasonable accommodation, or whether the leave will be extended. If the leave is extended, the director of counseling services and the coordinator of learning services or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodations can be made to allow the student to participate in the educational programs at the University and to continue to attend his/her classes while continuing to seek treatment.

In the event the leave is extended, the student must undergo a second medical evaluation shortly before the expiration of the extended leave with the University's consulting medical professional, at the student's expense, before returning to the University. The student must release all relevant medical information from his or her treating physician to the University's consulting medical professional prior to the evaluation. The results of the evaluation will be reviewed by the director of health and wellness or designee, and a decision will be made whether the student may return to the University immediately, with or without a reasonable accommodation, or whether the leave will be extended. If the leave is extended, the director of health and wellness and the coordinator of learning services or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to

participate in the educational programs at the University and to continue to attend his/her classes while continuing to seek treatment. If the student is permitted to return, the director of counseling services and the coordinator of learning services or their designees will conduct an individualized assessment and case-by-case determination as to whether and what reasonable accommodation(s) can be made to allow the student to participate in the educational programs at the University upon his or her return.

A student who has been placed on involuntary medical leave of absence is subject to the same policies as a student granted a voluntary leave of absence regarding financial aid and financial obligations as stated in the University's refund policy.

Appeals

Students may appeal the decision to require an involuntary medical leave of absence or to return from one. The appeal must be submitted in writing to the vice president and dean of students. All information submitted, including the results of the evaluations, become part of the student's health record and will be considered confidential.
